bitcoin, sales, and code

Vilnius, Vilniaus, Lithuania

Summary

GPG 060A33F73969A5CE

I'm into the philosophy of money. It's an expensive hobby, but it gives me meaning.

I'm a Senior software engineer and Team leader. Helping teammates grow in their careers makes me feel better than only developing code as an individual contributor.

My main tech stack:

80% back-end, 20% front-end.

.NET/C#, Typescript, React, Angular, Azure cloud

Sometimes, I meet with the Go and Rust communities, as we have similar interests. I've used Rust for some "crypto" smart contract development at past companies. I am only interested in Bitcoin at the moment (maximalist)

Experience

Talking Wallet | Kalbanti pinigine

Co-Founder

2024 - Present (less than a year)

Vilnius, Vilniaus, Lithuania

Ignitis Group

Senior Software Engineer

2023 - 2024 (1 year)
